Eastern Michaud Flats/Simplot OU (Pocatello, ID): This week EPA, IDEQ, the Shoshone-Bannock Tribes, and Simplot held their annual meeting on the Simplot Operable Unit. The Tribes continue to show significant concerns regarding the gypsum stack breach from last week, phosphorus levels in the Portneuf River, and sampling for radionuclides in groundwater. EPA will continue to work with the Tribes to try to address their concerns.

Eastern Michaud Flats/FMC OU (Pocatello, ID): Last week EPA provided comments to FMC on a proposed change to the soil cap remedial design to accommodate anticipated redevelopment on a portion of their property. Next week EPA, IDEQ, and the Tribes will be meeting with FMC and the development proponent to discuss concerns with the proposed design modification, impacts the redevelopment may have on other aspects of the remedy, and the schedule for construction of the project. FMC has indicated that the project proponent would like to start construction no later than March 1, 2016.
